

- BIO & RESEARCH INTERESTS** My research interests are information theory and coding theory, and, more broadly, communications, especially multi-user communication. My current research is on streaming codes, a class of codes designed for low-latency setting under packet loss models. Current error-correction techniques are inefficient in low-latency scenarios, and most effort has been destined to building private networks, thus improving infrastructure and reducing delay through more efficient routing and better network conditions. However, latency can be improved on the communication side, with a considerably less costly approach, by designing proper codes and techniques for this specific scenario.
- EDUCATION**
- University of Toronto**, Canada 2019-present
Doctor of Philosophy in Electrical & Computer Engineering
 Streaming codes.
- Federal University of Santa Catarina**, Brazil 2017 - 2019
Master of Science in Electrical Engineering
 Information theory and massive random access.
- Federal University of Santa Catarina**, Brazil 2012 - 2017
Bachelor of Science in Electrical Engineering
 Communications.
- PUBLICATION AWARDS**
- Best Communications Paper** 2019
XXXVII Brazilian Symposium on Telecommunications and Signal Processing
- Best Undergraduate Paper** 2016
XXXIV Brazilian Symposium on Telecommunications and Signal Processing
- JOURNAL PUBLICATIONS**
- [1] G. K. Facenda and D. Silva, *Efficient scheduling for the massive random access Gaussian channel*, Published in IEEE Trans. on Wireless Comm., 2020.
- PREPRINTS**
- [2] G. K. Facenda, M. N. Krishnan, E. Domanovitz, *et al.*, *Adaptive relaying for streaming erasure codes in a three node relay network*, Submitted to IEEE Transactions on Information Theory, 2022. [Online]. Available: <https://arxiv.org/abs/2203.05102>.
- [3] G. K. Facenda, E. Domanovitz, A. Khisti, *et al.*, “Streaming erasure codes over multi-access relay networks,” 2021, Accepted in IEEE Transactions on Information Theory. [Online]. Available: <https://arxiv.org/abs/2101.11117>.
- CONFERENCE PUBLICATIONS**
- [4] G. Kasper Facenda, E. Domanovitz, M. Nikhil Krishnan, *et al.*, “On state-dependent streaming erasure codes over the three-node relay network,” in *ISIT*, 2022.
- [5] E. Domanovitz*, G. K. Facenda*, A. Khisti, *et al.*, *Guaranteed rate of streaming erasure codes over multi-link multi-hop network*, *Equal contribution. Published in 2021 ITW., 2021.

- [11] —, *PSK and FSK Discrimination Based on Higher-order Statistics**, *English translation. Published in Portuguese in 2016 SBrT in poster format. Best undergraduate paper award., 2016.

TEACHING EXPERIENCE

University of Toronto - Teaching Assistant
 - Introduction to Machine Learning 2020-present

Federal University of Santa Catarina - Teaching Assistant
 - Communication Systems 2015-2016
 - Software-Defined Radio 2017

WORK EXPERIENCE

Huawei Canada - Ottawa Wireless Team 2022-present
 - Research on information theory and machine learning.

LINSE - Circuit and Signal Processing Laboratory - R&D Internship in Communications, DSP and Security 2013 - 2017
 - Activities included research and development in partnership with a local communications company, working in a team of five to ten students. Projects included developing and implementing DTMF detectors; implementing voice CODECs in Blackfin Assembly; researching, developing and implementing modulation classifiers in software-defined radio; developing and implementing an automatic voice descrambler.

- In 2016 and 2017, activities also included training students new to the group in C, MATLAB and Analog Devices' Blackfin Assembly.

OTHER SKILLS

Intermediate Level
 C, MATLAB, Analog Devices' Blackfin Assembly, GNU Radio, Simulink

Beginner Level
 Python, Javascript, Linux

OTHER EXPERIENCES

Chair of Undergraduate Session 2020
XXXVIII Brazilian Symposium on Telecommunications and Signal Processing
